Contents of Volume Four

Volume Four/Number One/1965

An interpretive program for matrix arithmetic 2
F. H. Branin, Jr., L. V. Hall, J. Suez, R. M. Carlitz, and T. C. Chen

Algorithm for computer control of a digital plotter 25
J. E. Bresenham

An analysis of floating-point addition 31
D. W. Sweeney

On the reliability of polymorphic systems 43
P. D. Welch

A technique to control waiting time in a queue 53
S. Shapiro

Notes on testing real-time system programs 58
M. G. Ginzberg

Serial compilation and the 1401 FORTRAN compiler 73
L. H. Haines

Volume Four/Number Two/1965

Fabrication and assembly operations 86

Part I The outlines of a control system 87
C. T. Baker

Part II Long-range planning techniques 94
A. B. Calica

Part III Matrix methods for processing configuration data 105
P. G. Loewner

Part IV Linear programming in production planning 122
B. P. Dzielinski

The construction of discrete dynamic programming algorithms 136
M. Held and R. M. Karp

Algorithms for traffic-signal control 148
L. A. Yardeni

Computer channel interference analysis 162
W. Chang and D. J. Wong

Volume Four/Number Three/1965

GPSS III—an expanded general purpose simulator 174
H. Herscovitch and T. Schneider

On dynamic program relocation 184
W. C. McGee

A computer-aided linkage analysis system 200
F. Bitonti, D. W. Cooper, D. N. Frayne, and H. H. Hansen

Fabrication and assembly operations 224

Part V Production order sequencing 225
A. B. Calica

Part VI Parameter values for sequencing control 241
S. Gorenstein

Part VII Adaptive control in production planning 250
S. Shapiro
